

"Frozen Ground"

by Frozen Fury

VERSE 1

Beneath the ancient northern skies
Where winter's breath never dies
I walk on hallowed frozen ground
Where echoes of the past resound

CHORUS

Frozen ground beneath my feet
Ancestral spirits that I meet
The ice that burns, the frost that sears
This frozen ground has stood for years

VERSE 2

Mountains rise like gods of old
Their stories in the ice are told
The fury of a frozen world
Where ancient banners are unfurled

BRIDGE

Hear the howling of the wind
Feel the cold against your skin
We are born of frost and flame
Children of the northern name

VERSE 3

When thunder breaks the silent night
And lightning splits the sky with light
I stand my ground on frozen soil
Through endless winter's constant toil

CHORUS

Frozen ground beneath my feet
Ancestral spirits that I meet
The ice that burns, the frost that sears
This frozen ground has stood for years

OUTRO

We are one with frozen ground
In ice and darkness we are bound
When all is lost and hope has fled
The frozen ground remains ahead
